| About the Authors                           | iv         |
| Introduction                                | xi         |
| Acknowledgments                             | xvi        |
| Chapter 1 Basic Statistical                 | •          |
| and Diagnostic Tre                          | <b>e</b> 1 |
| Categories of Data                          | 2          |
| Sampling Methods                            |            |
| Diagnostic Tree                             |            |
| SQL Data Extraction Examples                |            |
| Chapter 2 Measures of Centra and Dispersion | 1 Tendency |
| Measures of Central Tendency                | 10         |
| Mean  |            |
| Median                                      |            |
| Mode  |            |
| Geometric Mean                              |            |
| Weighted Mean                               |            |
| Measures of Dispersion                      |            |
| Histogram Construction                      |            |
| Range                                       |            |
| Standard Deviation                          |            |
| Conclusion                                  | 40         |

| Chapter 3 Goodness of Fit  | 41              |
|--|-----------------|
| Tests of Hypothesis  | 43              |
| Goodness of Fit Test   |                 |
| Fitting a Normal Distribution to Observed Data   |                 |
| Fitting a Poisson Distribution to Observed Data  |                 |
| Fitting an Exponential Distribution to Observed Data   |                 |
| Conclusion   |                 |
| T-SQL Source Code  |                 |
| Make Intervals   |                 |
| Combine Intervals  |                 |
| Compare_Observed_And_Expected  |                 |
| Procedure Calls  |                 |
| Comparing a Single Mean to a Specified Value  Comparing Means and Variances of Two Samples  Comparisons of More Than Two Samples | 88<br>94<br>101 |
| Conclusion   |                 |
| T-SQL Source Code  |                 |
| Calculate_T_Statistic  |                 |
| Calculate_Z_Statistic  |                 |
| Compare_Means_2_Samples  | 108             |
| Contingency_Test   | 113             |
| Procedure Calls  | 117             |
| Chapter 5 Curve Fitting  | 119             |
| Linear Regression in Two Variables   | 121             |
| Linear Correlation in Two Variables  |                 |
| Polynomial Regression in Two Variables   | 130             |
| Other Nonlinear Regression Models  |                 |
| Linear Regression in More Than Two Variables   |                 |
| Conclusion   |                 |
| T-SQL Source Code  |                 |
| Linear Regression 2 Variables  |                 |
| Gaussian Elimination   |                 |
| Array_2D   |                 |
| Polynomial Regression  |                 |
| Exponential Model  |                 |
| Multiple Linear Regression   |                 |
| Procedure Calls.   |                 |

| Chapter 6 Control Charting                      | 181 |
|---|-----|
| Common and Special Causes of Variation          | 183 |
| Dissecting the Control Chart                    |     |
| Control Charts for Sample Range and Mean Values |     |
| Control Chart for Fraction Nonconforming        |     |
| Control Chart for Number of Nonconformities     | 213 |
| Conclusion                                      |     |
| T-SQL Source Code                               |     |
| Sample Range and Mean Charts                    |     |
| Standard P Chart                                |     |
| Stabilized P Chart                              |     |
| C_Chart   |     |
| Procedure Calls                                 |     |
| Chapter 7 Analysis of Experimental Designs      | 229 |
| One-Way ANOVA                                   | 231 |
| Two-Way ANOVA                                   |     |
| ANOVA Involving Three Factors                   |     |
| Conclusion                                      |     |
| T-SQL Source Code                               |     |
| ANOVA   | 261 |
| Procedure Calls                                 | 275 |
| Chapter 8 Time Series Analysis                  | 277 |
| Simple Moving Average                           |     |
| Single Exponential Smoothing                    |     |
| Double Exponential Smoothing                    |     |
| Incorporating Seasonal Influences               | 300 |
| Criteria for Selecting the Most Appropriate     |     |
| Forecasting Technique                           |     |
| Conclusion                                      |     |
| T-SQL Source Code                               | 311 |
| Simple Moving Average                           |     |
| Weighted Moving Average                         |     |
| Single Exponential Smoothing                    | 318 |
| Double Exponential Smoothing                    |     |
| Seasonal Adjustment                             | 327 |
| Procedure Calls                                 | 332 |
